Overview

HPE OfficeConnect 1950 Switch Series

The HPE OfficeConnect 1950 Series is a smart Web-managed 10-Gigabit and Gigabit platform for advanced small business networks needing highest performance now or in the future.

The HPE OfficeConnect 1950 Switch Series includes five switches: New to the series is a 16-port 10-Gigabit aggregation switch that has 12 10GBASE-T and 4 SFP+ ports, which is ideal as the core of a high performance workgroup or small business network. Additional series models have Gigabit access ports with 10-Gigabit uplinks, including two standard and two PoE+ models in 24- and 48-port configurations. The access switches each have two 10GBASE-T ports supporting copper- based Category 6A-based cabling, and two 10G SFP+ ports for fiber connectivity. The PoE+ models both have a PoE power budget of 370 W to power up PoE/PoE+ compliant client devices.

The HPE OfficeConnect 1950 Switch Series has an intuitive Web-based interface for simple customization of network operation. It supports true-stacking, the aggregation switch supporting up to two devices, while the access switches allowing up to four devices, to be logically administered as a single entity, simplifying administration while supporting greater network redundancy. Models support both rack mounting and desktop operation. These switches have IPv4 and IPv6 operation, with Layer 2 switching as well as Layer 3 static routing. Other features include: link aggregation to boost link performance; VLANs, Access Control Lists, and 802.1X network login for enhanced security; and three versions of Spanning Tree Protocol (STP) for added network resiliency. HPE OfficeConnect 1950 Switch Series is covered by a Limited Lifetime Warranty.

HPE OfficeConnect 1950 Switch Series

Overview

Models

HPE OfficeConnect 1950 12XGT 4SFP+ Switch	JH295A
HPE OfficeConnect 1950 24G 2SFP+ 2XGT Switch	JG960A
HPE OfficeConnect 1950 48G 2SFP+ 2XGT Switch	JG961A
HPE OfficeConnect 1950 24G 2SFP+ 2XGT PoE+ Switch	JG962A
HPE OfficeConnect 1950 48G 2SFP+ 2XGT PoE+ Switch	JG963A

Key features

- 10G Connectivity for fast network to servers and storage
- Combination of SFP+ and 10GBASE-T ports—supports both fiber and cost-effective copper connectivity
- True stacking allows for redundancy while simplifying administration
- Customized operation using intuitive Web interface
- Limited Lifetime warranty

Standard Features

Management

Four-high true stacking

Simplifies administration of multiple devices. Create a single logical managed unit with up to four HPE OfficeConnect 1950 switches. Balance connections across multiple units with standard Link Aggregation (LACP) for enhanced network resiliency. Stack using affordable Cat 6a, or long distance fiber, or localized DAC cables. Stacked units can be co-located or separated physically.

Intuitive Web browser-based management

Allows for easy customization of the switch even by non-technical users.

• Secure Web-management sessions with HTTPS / SSL

Encrypts and otherwise protects management sessions through HTTP Secure (HTTPS). Prevents snooping of sensitive management information such as passwords.

• SNMPv1, v2c, and v3

Facilitates remote management of the switch, as the device can be discovered and monitored from an SNMP management station

• Complete session logging

Provides detailed information for problem identification and resolution

Dual flash images

Provides independent primary and secondary operating system files for backup while upgrading

• Port mirroring

Enables traffic on a port to be simultaneously sent to a network analyzer for monitoring

• Network Time Protocol (NTP)

Synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time

• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

 Advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications

• Limited Command Line Interface (CLI)

 Facilitates in the deployment and initial configuration of the unit. Supports troubleshooting actions as well.

RMON

Provides advanced monitoring and reporting capabilities for statistics, history, alarms, and events

• Default DHCP client modes

Simplifies device deployment. Connect a new out-of-the box switch to a network with a DHCP server
and the device will obtain its IP address automatically with plug-and-play operation. In the absence of
a DHCP server, the switch will fall-back to a unique static address determined by the switch's MAC
address.

• Cable diagnostic tool

Use to remotely detect cable issues with cables attached to the switch.

Quality of Service (QoS)

• Broadcast control

Allows limitation of broadcast traffic rate to cut down on unwanted network broadcast traffic

Rate limiting

Sets per-port ingress enforced maximums and per-port, per-queue minimums

• Traffic prioritization

Makes it possible to prioritize important and/or time-sensitive traffic ahead of less important traffic. Use with VoIP or video to optimize its performance on the network. Recognizes both IEEE 802.1p and DSCP prioritization tagging. Packets are mapped to four hardware queues for more effective throughput.

Powerful QoS feature

Supports the following congestion actions: strict priority queuing (SP), weighted round robin (WRR) queuing, and SP+WRR

Standard Features

Connectivity

Auto-MDI/MDIX

Adjusts automatically to straight-through or crossover cables on all 10/100/1000 and 10GBASE-T ports.

• IEEE 802.3X flow control

Provides a configurable flow throttling mechanism propagated through the network to prevent packet loss at a congested node.

• Packet storm protection

Protects against broadcast, multicast, or unicast storms with user-defined thresholds

• Jumbo frame support up to 10-kilobyte frames

Improves efficiency of data transfers by allowing more data into a given packet. This especially useful for transfers of large amounts of data. HPE 1950 Switches support up to 10 kilobyte frame sizes.

• IEEE 802.3at Power over Ethernet (PoE+)

Delivers power to compliant devices over Ethernet cabling, greatly simplifying installation of those devices. The HPE OfficeConnect 1950 Series has two PoE+ enabled models. The PoE+ 802.3at standard supports delivery of up to 30 Watts of power to the attached devices, enough to support the latest models of IP phones, Wireless Access Points, video surveillance cameras, or other PoE/PoE+ enabled devices. HPE 1950 PoE+ models support 370W of total PoE power.

• IEEE 802.3af Power over Ethernet (PoE) ready

Delivers power to compliant devices over Ethernet cabling, greatly simplifying installation of those devices. HPE 1950 PoE+ models are fully backward compliant with the older PoE standard which provides up to 15.4 Watts of PoE power per port to attached devices.

Available redundant power for PoE+ models

Optional Redundant Power System is available to add power redundancy and to supplement the PoE power of the PoE+ switches. With the optional RPS, the PoE+ power budget can be increased to 740 Watts; additionally, the switch will continue operating and powering downstream PoE devices even if the unit internal power supply should fail. Order the HPE RPS1600 Redundant Power System (JG136A).

• Fully IPv6 capable

-IPv6 host

enables switches to be managed and deployed at the IPv6 network's edge

-IPv6 routing

supports IPv6 static routes

-MLD snooping

forwards IPv6 multicast traffic to the appropriate interface, preventing traffic flooding

-IPv6 ACL/QoS

supports ACL and QoS for IPv6 network traffic

Security

Access Control Lists (ACLs)

Gives granular control over what traffic goes where in the network. Allows for traffic filtering. ACLs rules can be based on MAC-address or IP-address. ACL rules can be time-based to implement access control during certain hours or days.

• IEEE 802.1X and RADIUS network logins

Controls port-based access for authentication and accountability

• Automatic VLAN assignment

Assigns users automatically to the appropriate VLAN based on their identity, location and time of day

Port isolation

The port isolation feature isolates Layer 2 traffic for data privacy and security without using VLANs. This feature can also be used to isolate the hosts in a VLAN from one another

Standard Features

ARP attack protection

The ARP detection feature enables access devices to block ARP packets from unauthorized clients to prevent user spoofing and gateway spoofing attacks

• STP BPDU port protection

Blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks

STP root guard

Protects the root bridge from malicious attacks or configuration mistakes

• Automatic denial-of-service protection

Protects the network by blocking malicious DoS attacks aimed at the switch itself.

Management password

Provides security so that only authorized access to the Web browser interface is allowed

Performance

Half-/full-duplex auto-negotiating capability on every port

Doubles the throughput of every port

• Selectable queue configurations

Allows for increased performance by selecting the number of queues and associated memory buffering that best meet the requirements of the network applications

• IGMP / MLD Snooping

Improves network performance by filtering multicast traffic when there is no multicast receiver on a connection. Without this, multicast traffic is flooded to all ports. IGMP snooping is used in IPv4 networks. The IPv6 equivalent MLD Snooping is also supported.

• 10-Gigabit SFP+ based Fiber Uplinks

Supports high-bandwidth connections over fiber. HPE 1950 Switches each have two SFP+ transceiver slots supporting 10-Gigabit fiber-based connections using optional 10G transceivers. Fiber is particularly suited for connecting at distances beyond the 100 Meter limitation of copper-based Cat 5e cabling. Alternatively use the SFP+ ports for redundant stacking of up to four units using Direct Attached Cables (DAC).

• 10-Gigabit 10GBASE-T RJ45 Uplinks

Supports high-bandwidth connections over Cat 6a cabling. HPE 1950 Switches each have two 10GBASE-T RJ45 ports supporting 10-Gigabit copper-based connections. Cat 6a is economical and practical for distances up to 100 meters. Alternatively use the 10GBASE-T ports for redundant stacking of up to four units.

Layer 2 switching

VLAN support and tagging

Supports IEEE 802.1Q with 4,094 simultaneous VLAN IDs

Spanning Tree Protocol (STP)

Supports standard IEEE 802.1D STP, IEEE 802.1w Rapid Spanning Tree Protocol (RSTP) for faster convergence, and IEEE 802.1s Multiple Spanning Tree Protocol (MSTP)

BPDU filtering

Improves network efficiency by filtering unnecessary BPDU packets on a port. When Spanning Tree Protocol (STP) is enabled globally but disabled on specific ports, BPDU packets are not sent out the ports where STP is disabled.

Layer 3 services

Address Resolution Protocol (ARP)

Determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network

DHCP relay

Simplifies management of DHCP addresses in networks with multiple subnets

Standard Features

Layer 3 routing

Static IPv4/IPv6 routing

Provides basic routing (supporting up to 32 static routes and 8 virtual VLAN interfaces); allows manual routing configuration

Resiliency and high availability

Link aggregation

Groups together up to 8 ports per trunk automatically using Link Aggregation Control Protocol (LACP), or manually, to form an ultra-high-bandwidth connection to the network backbone; helps prevent traffic bottlenecks. The switch supports up to 128 trunks.

Convergence

• LLDP-MED (Media Endpoint Discovery)

Defines a standard extension of LLDP that stores values for parameters such as QoS and VLAN to configure automatically network devices such as IP phones

Auto voice VLAN

Recognizes IP phones and automatically assigns voice traffic to dedicated VLAN for IP phones

• PoE Models For Converged Voice / Data Networks

Simplifies and lowers the cost of installing a converged infrastructure. Power IP phones, Access Points, Video Surveillance cameras, or other PoE-enabled devices. HPE 1950 Switches support multiple methods of allocating PoE power -- IEEE 802.3af class, LLDP-MED, or user-specified -- for more efficient energy useage.

Additional information

• Green initiative support

Provides support for RoHS and WEEE regulations

Green IT and power

Improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes variable-speed fans, reducing energy costs

Energy Efficient Ethernet

Compliant with IEEE 802.3az standard requirements to save energy during periods of low data activity

Warranty and support

Limited Lifetime Warranty

See http://www.hpe.com/officeconnect/support for warranty and support information included with your product purchase.

Configuration Information

Build To Order: BTO is a standalone unit with no integration. BTO products ship standalone are not part of a CTO or Rack-Shippable solution.

	Non-operating/Storage relative humidity	5% to 95%, noncondensing	
	Altitude	up to 16,404 ft (5 km)	
	Acoustic	Low-speed fan: 19.0 dB, High-speed fan: 44.5 dB; ISO 7779 Dual speed fan	
Electrical	Frequency	50/60 Hz	
characteristics	Voltage	100 - 240 VAC, rated	
	Maximum power rating	34 W	
	Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.	
Safety	UL 60950; IEC 60950-1; EN 60950-1; GB 4943.1		
Emissions	FCC part 15 Class A; VCCI Class A; EN 55022 Class A; CISPR 22 Class A; EN 55024; EN 61000-3-2 2000, 61000-3-3; ICES-003 Class A		
Management	IMC - Intelligent Management Center; Limited command-line interface; Web browser; SNMP Manager; HTTPS; RMON1; FTP; Supported by HPE IMC and generic SNMP management platforms. Refer to documentation for MIB support details.		
Services	Refer to the Hewlett Packard Enterprise website at http://www.hpe.com/networking/services for details on the service-level descriptions and product numbers. For details about services and response times in your area, please contact your local Hewlett Packard Enterprise sales office.		

Technical Specifications

HPE OfficeCo	nnect 1950 48G 2SFP-	- 2XGT Switch (JG961A)		
I/O ports and	48 RJ-45 auto-negotiating 10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u			
slots	Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T)			
	2 SFP+ fixed 1000/10000 SFP+ ports			
Additional	2 RJ-45 1/10GBASE-T ports 1 RJ-45 console port to access limited CLI port			
orts and slots	1 KJ-45 Console port to at	ccess inflited CLI port		
Physical	Dimensions	17.32(w) x 10.63(d) x 1.73(h) in (44 x 27 x 4.4 cm) (1U height)		
characteristics	Weight	11.02 lb (5 kg)		
Memory and processor		er size: 3 MB, 1 GB SDRAM		
Mounting and enclosure	Mounts in an EIA standard	d 19-inch telco rack or equipment cabinet (hardware included)		
Performance	100 Mb Latency	< 5 µs		
	1000 Mb Latency	< 5 µs		
	10 Gbps Latency	< 1.5 μs		
	Throughput	up to 130.9 Mpps (64-byte packets)		
	Routing/Switching	176 Gbps		
	capacity			
	Routing table size	32 entries (IPv4), 32 entries (IPv6)		
	MAC address table size	16384 entries		
Reliability	MTBF (years) 51			
Environment	Operating temperature	32°F to 113°F (0°C to 45°C)		
	Operating relative humidity	10% to 90%, noncondensing		
	Non-operating/Storage temperature	-40°F to 158°F (-40°C to 70°C)		
	Non-operating/Storage relative humidity	5% to 95%, noncondensing		
	Altitude	up to 16,404 ft (5 km)		
	Acoustic	Low-speed fan: 38.4 dB, High-speed fan: 47.0 dB; ISO 7779 Dual speed fan		
Electrical	Frequency	50/60 Hz		
haracteristics	Voltage	100 - 240 VAC, rated		
	Maximum power rating	54 W		
	Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.

Standards and Protocols (applies to all products in series) **Device management**

RFC 2819 RMON

General protocols

- IEEE 802.1D MAC Bridges
- IEEE 802.1D Spanning Tree Protocol
- IEEE 802.1p Priority
- IEEE 802.1Q VLANs
- IEEE 802.1s Multiple Spanning Trees
- IEEE 802.1W Rapid Spanning Tree Protocol
- IEEE 802.1X
- IEEE 802.3 Type 10BASE-T
- IEEE 802.3ab 1000BASE-T
- IEEE 802.3ad Link Aggregation Control Protocol (LACP)
- IEEE 802.3af Power over Ethernet
- IEEE 802.3at PoE+
- IEEE 802.3i 10BASE-T
- IEEE 802.3x Flow Control
- IEEE 802.3z 1000BASE-X

Network management

- IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
- IEEE 802.1D (STP)
- RFC 1215 SNMP Generic traps

QoS/Co

• IEEE 802.1p (CoS)

Security

• IEEE 802.1X Port Based Network Access Control

Technical Specifications

MIBs

- RFC 1213 MIB II
- RFC 1493 Bridge MIB
- RFC 2021 RMONv2 MIB
- RFC 2233 Interface MIB
- RFC 2233 Interfaces MIB
- RFC 2571 SNMP Framework MIB
- RFC 2572 SNMP-MPD MIB
- RFC 2573 SNMP-Notification MIB
- RFC 2573 SNMP-Target MIB
- RFC 2613 SMON MIB
- RFC 2618 RADIUS Client MIB
- RFC 2620 RADIUS Accounting MIB
- RFC 2665 Ethernet-Like-MIB
- RFC 2667 IP Tunnel MIB
- RFC 2668 802.3 MAU MIB
- RFC 2674 802.1p and IEEE 802.1Q Bridge MIB

- RFC 3418 MIB for SNMPv3

Date	Version History	Action	Description of Change:
07-Dec-2020	Version 12	Changed	Configuration Information section was updated.
05-Aug-2019	Version 11	Changed	Related Options was updated SKU descriptions were updated Obsolete SKUs were removed New SKUs were added
05-Feb-2018	Version 10	Changed	Technical Specifications, Configuration and Accessories updated
04-Sep-2017	Version 9	Changed	Updates made on Features and benefits
30-May-2017	Version 8	Changed	Minor updates made on Technical Specifications
05-Sep-2016	Version 7	Added	Model added: JH295A
01-Aug-2016	Version 6	Changed	Adding #AC3 Option on Configuration section Technical Specifications updated
06-May-2016	Version 5	Changed	Document name changed to HPE OfficeConnect 1950 Switch Series. SKU descriptions, Features and Benefits and Overview updated.
01-Dec-2015	Version 4	Changed	Overview and Technical Specifications updated
28-Sep-2015	Version 3	Changed	Bundles section added on Accessories. SKUs added: JH376A, JH377A Minor changes on the Overview section
29-Jun-2015	Version 2	Changed	Changes made on the Product overview and Features and benefits sections
06-Mar-2015	Version 1	New	New QuickSpecs
